Milan Manshoven
Easi
Rijvisschestraat 124
9052, Gent

Dear Milan Manshoven and Felix De Smet,

I am writing to express my strong interest in the Junior Data Consultant position at Easi as advertised on your website. I am a recently graduated computer scientist with a specialization in data science and artificial intelligence. I am eager to bring my analytical mindset, technical skills, and proactive approach to contribute to Easi's mission of delivering customized data solutions. By combining my passion for data with a strong commitment to understanding client needs, I am confident in my ability to support the company's innovative and client-focused initiatives.

With a master's degree in IT and a strong foundation in big data and database management, including experience with Microsoft SQL and MySQL, I am well prepared to face the challenges of this role. My passion for exploring technologies in Business Intelligence and Data Science has led me to complete projects that required data collection, transformation, and visualization, aligning closely with the responsibilities of this position. To exemplify this, I invite you to explore my GitHub profile, where I showcase several projects that involve ETL and automated report generation. These examples reflect my ability to handle end-to-end data workflows and my eagerness to continuously refine my skills.

Easi's mission to deliver high-value IT solutions through humanized technology and its recognition as a Best Workplace since 2015 are both aspects that deeply resonate with me. The company's focus on mentorship, continuous learning through the Easi Academy, and a culture of collaboration reflect an environment where I am confident that I can thrive and grow.

I am excited about the opportunity to join Easi and contribute to your innovative projects. I would love the chance to discuss how my skills align with the needs of your team and explore how we can be a great fit for each other. Thank you for your time and I look forward to the opportunity to speak with you soon.

Kind Regards,

Bauke Blomme
Computer Scientist and Data Engineer
